- 3. Jumper J4 must be connected and J3 removed.

Sound Board

- 1. Model D 8224 required for speech.
- Must be jumpered for white-labeled sound ROM operation and be equipped with Sound ROM 3. (Jumpers W2, W5, W7, W9, W10, and W15 connected; W3, W4, W6, W8, W11, W12, and W13 removed)

Power Supply Board

1. Fuse F4 (10A SB) for flipper solenoids must be installed.

Optional Speech Module

1. Requires 5T4971 (IC7), 5T4972 (IC5), and 5T4973 (IC6) speech ROMs.

GAME OPERATION

*Indicates adjustable features

Game Over Mode -Turn game ON; player scores show zero, high score to date* alternates with player 1 score, player 1 up lamp flashes, game over lamp lights, all playfield lamps except for credit lamp except in attract mode.

Credit Poeting - Insert coin; knocker sounds, number of credits displayed. If maximum credits exceeded by coin or high score to date*, credits are posted correctly, coin lockout deenergized until remaining credits are below maximum. No credits may be won and coins are rejected while lockout is deenergized.

Game Start - Push credit button; start-up tune played, ball served, credit display reduced by one-

-button before ball-2 displayed: allows additional players.

MULTI-BALL and LANE CHANGE are trademarks of Williams Electronics, Inc.

Bonus Advance - "F-I-R-E" rollovers when not lit, flashing "1-6" targets, left and right inside rollovers (3 advances when lit), and left and right outside rollovers. Bonus multiplier advanced and FIRE insert lit by spotting "F-I-R-E". "F-I-R-E" lamps rotate by actuating right flipper (LANE CHANGE™ feature).

FIREPOWER - Making three POWER targets scores 10,000 and lites POWER insert, left and right inside rollovers, and *ball saver kicker ON. Liting FIRE and POWER inserts scores and advances FIREPOWER bonus (5,000 or lit values of 10, 30, and 50,000). Outlane Special lit when *30, or 50,000 bonus collected.

"1-6" Targets - *Making "1-3" or "4-6" or same ball lights ball saver kicker ON. Spotting 1-6" lights ball saver kicker ON*, flashes two eject holes, lights spinner, and alternately lights two jet bumpers; adjustable to flash eject holes one at a time (always one at a time once MULTI-BALL play is achieved). Spotting "1-6" twice on the same ball lights all jet bumpers.

Eject Holes - Making eject hole when flashing locks up ball and new ball released per following order: from ball ramp, flashing eject hole, unlit eject hole. Locking up all balls in eject holes initiates MULTI-BALL play. To minimize multiple player interaction, lit and flashing eject holes are reallocated from ball to ball as required: flashing lamp to empty eject hole if possible; lit lamp to occupied eject hole if possible.

Extra Ball - Maximum of two Extra Balls per ball. Lighting *5x or making "F-I-R-E" with 5x lit lights center POWER target for Extra Ball. Making target when lit awards Extra Ball.

Tilts - Ball in play tilted on first closure of Playfield and Ball Roll tilts and third* closure of Plumb Bob. Slam Tilt returns game to game over.

Memory - "F-I-R-E" lanes, FIRE insert, POWER Target lamps, POWER insert, *FIREPOWER bonus lamps, *lit target arrows, eject hole lamps.

End of Game - Match Digits* appears in ball in play display, *credit awarded for match. Exceeding high score to date awards *three credits. Match, High Score to Date, and Game Over sounds made as appropriate. Balls released from eject holes and are placed on ball ramp before new game can be started.

Notes:

- 1. Functions 00-11 cannot be changed from the coin door; however, Functions 01-11 can be set to zero as described on page 7.
- 2. Total Credits (Function 08) is the sum of Function 04 and as applicable, Functions 05, 06, and 07.
- 3. Total Extra Balls (Function 09) is the sum of the game extra ball feature and Functions 15 and 06, as applicable.
- 4. Current High Score to Date (Function 12) can be changed to the value of the Backup High Score to Date (Function 13) by operating the HIGH SCORE RESET switch while in the game over mode.
- 5. Function 13 may be set to any multiple of 10,000 points. Setting Function 25 to zero with Function 13 set to any score but zero permits the High Score to Date feature to operate but no credits are awarded.
- 6. Functions 14-17 (Replay Scores) may be set to any multiple of 10,000 points. Setting a function to zero disables the replay score point. Always disable the Replay 4 level first, the Replay 3 level second, etc. The replay levels must be set with ascending values.
- 7. Setting Maximum Credits (Function 18) to zero places the game in a free play mode.
- 8. With Function 19 set to 00, Functions 20-24 must be set manually. Refer to Table 2 for seven standard pricing schemes (selected by values of 01-07 for Function 19) and custom pricing values.
- 9. For 5-Ball play, it is recommended that Function 31 be set to 02.
